2016 OSHA TRAININGS!

Project BEST Safety Consultant Ty Lollini of 1949 Consulting, LLC will be conducting the classes listed below for Project BEST contributors in WHEELING at the OVCEC safety training room located at 21 Armory Drive in Wheeling, WV and in STEUBENVILLE at 626 North 4th Street, (IBEW Hall) Steubenville, OH. Please note which location the classes are being held.

AUGUST 23-26: 30 Hour in **WHEELING**

PRE-REGISTRATION IS MANDATORY! CLASS SIZE IS LIMITED TO 20 PERSONS.

CONTACT LISA AT: (304) 214-9800 OR AT LISA@PROJECTBEST.COM.

Reminder: All safety training classes will be **FREE** to Project **BEST** Contributors.

**No shows who have made reservations
will be charged **\$25.00**.**

Even though OSHA has no expiration date on the 10 and 30 hour safety training cards, they might be considered by our customers as outdated, requiring you to obtain a new card. You are advised to check accordingly before you go to the work site.

Other Training Information: The 10-hour, 30-hour and specific type training classes can be provided by contacting the safety consultant and scheduled so long as (5) or more persons are scheduled for attendance and advance notice of one week is made with the instructor. Locations for training will be dependent upon availability and suitability of training space accommodations.

- Find the Shade

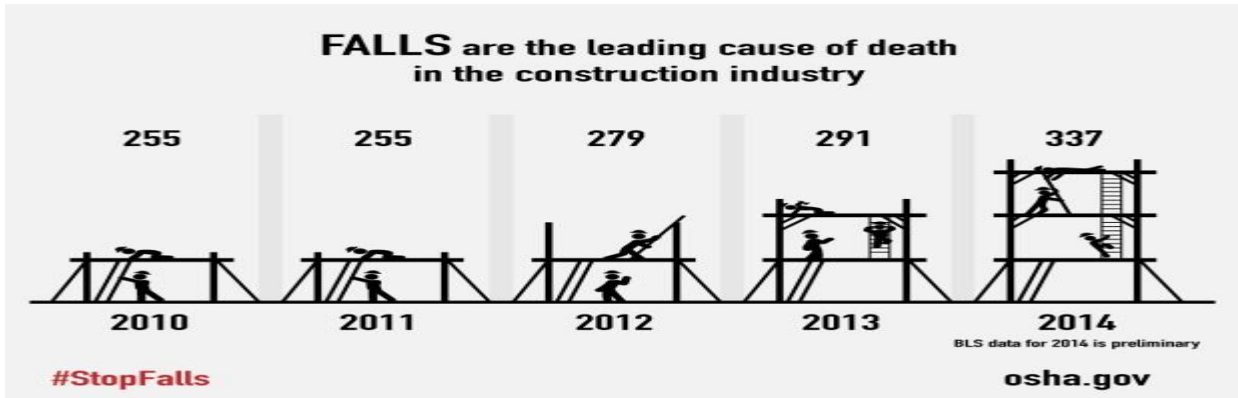

SAFETY FIRST.

**THE SAFE WAY IS
THE BEST WAY**

**FIVE COMPANIES FACE OSHA VIOLATIONS, \$115K IN FINES AFTER FEDERAL INSPECTORS
OBSERVE MULTIPLE SAFETY HAZARDS AT LINCOLN CONSTRUCTION SITE
FRAMERS OBSERVED WORKING WITHOUT FALL PROTECTION –
A LEADING CAUSE OF CONSTRUCTION WORKER DEATH**

LINCOLN, Neb. - The deadly fact is this: nearly 40 percent of all deaths in the construction industry are the result of a preventable fall. Yet, some employers continue to ignore the dangers and put their workers at risk of a debilitating or fatal fall.

As the construction industry continues to grow, falls continue to be the leading cause of death. Source: <http://www.bls.gov>.

At an apartment complex construction site in Lincoln, the U.S. Department of Labor’s Occupational Safety and Health Administration found construction contractors jeopardizing the safety and health of workers. The agency’s inspection resulted in citations for five companies working at the three-building complex.

“A worker’s life can be forever altered or ended in the seconds it takes to fall,” said Jeff Funke, OSHA’s area director in Omaha. “Controlling contractors and subcontractors have a responsibility to protect workers on its construction sites from falls which cause 4 out of 10 workplace fatalities in the construction industry. More tragic than that is the reality that these falls are preventable.”

Following its December 2015 investigation, OSHA has issued citations as follows:

- #1 contractor - Subcontracted for framing work, faces \$65,450 in fines for one willful and three serious safety violations.
- #2 contractor - Faces fines of \$33,000 for one willful violation and three serious violations.
- #3 contractor - Issued six serious safety violations and faces proposed penalties of \$9,100.
- #4 contractor - Faces proposed penalties of \$4,500 for three serious violations.
- #5 contractor - Faces \$3,150 in proposed penalties for three serious violations.

Federal safety and health officials are determined to reduce the numbers of preventable, fall-related deaths in the construction industry.

It is imperative that all labor and management affiliates of Project BEST be aware of the importance of this weekly safety reminder page which serves as the vital communication link between the Project BEST Safety Committee and all contributing members, **especially those working in the field**. This safety reminder can be easily copied and distributed via each employer’s internal mailing system such as a paycheck envelope or equivalent method. Your assistance in this matter is greatly appreciated. Thank you!
